

Mini Lesson 3: Collecting Coins

Grade Level: Kindergarten

Curriculum: Money and Mathematics

AR. Math.Content.K.MD. C.6 Identify pennies, nickels, and dimes, and know the value of each

Note: This is an introduction skill and is addressed more formally in the upcoming grade levels.

Tools: Animoto & Quizlet

Synopsis: I will begin this lesson using animoto. On animoto, I will create short, 30 second videos over each coin; the penny, nickel, and dime. In these videos I will show pictures of each coin as well as talk about their value. I will repeat myself several times giving the student several chances to grasp the concept. The students will watch those videos as a whole class. After I play those three videos, I will then have each student go to quizlet individually. On quizlet I will have a page that has each coin along with a picture. I will also have another list of each coin with the value of it. The students will play the games on quizlet to practice and master the skill.
