

Educational Software Write-Up

Title: Learn Piano with OnlinePianist

Version: 1.96.5

Publisher: Online Pianist

Target Audience: 4+

Type of Software: Tutorial

Curriculum: This software would be great for students to use in music classes or as a brain break activity.

Possible Environment: This could be used by a single user.

Cost: Free

Describe the Software: This software uses unique players to learn how to play the piano. There are tutorials from famous artists that go along with the app. There are many different features inside the software to improve piano practices. The user learns about key terms for playing the piano while using the software. There are several more options available for the paid version of the app.

Impression of Software: We were not too impressed by this software. We believe this app is very difficult. It is not user friendly for the age it says. The songs were upper level and hard to play. We did not feel this would be a good app for elementary students to use although it appears to be. Young students would not have the fine motor skills yet that are necessary to use this software.

Does the app pass? No
