Educational Software Write-Up

Title: Wikids Talking Encyclopedia

Version: 3.5

Publisher: KdkeDoo Ltd.

Target Audience: 4+, Made for Ages 0-5

Type of Software: Discovery Learning

Curriculum: This software would be great for students to use to learn new information. Students could explore the app and learn about a wide variety of topics.

Possible Environment: This could be used by a single user or a small group and the teacher could use this as a tool.

Cost: Free

Describe the Software: This software has a large amount of educational information. Kids can explore and discover so many things. This app talks to the user and enables kids who can't read yet. This allows students of younger ages or lower level students to learn and participate as well. There are so many categories to choose from in this software: animals, the human body, space, countries, nature, musical instruments, landmarks and monuments, and traditional food. This app encourages kids to continue exploring throughout by using a medal system. There are great images and narration to go along with the category selected.

Impression of Software: We were very impressed with this software. It was a high quality app that early learners could use. It was very easy to navigate through and pay attention to. The images and narration kept the user interested. We thought this would be great for preschool and kindergarten age students to explore through.

Does the app pass? Yes
