

Ashley Bass  
Mini Lesson 3

1. Grade level/Audience – Fifth grade
2. Curriculum topic- Life Science-Respiratory System
3. Tools- [Padlet](#) and Clips
4. Students will work in groups of three. Students are to use Padlet to create a board of how our respiratory system works. They need to list parts and functions that are found in the system. I want them to get creative on how the board will look. Students will use the Clips app to add pictures of what they have drawn. They will draw out the organs in the respiratory system to put in Clips. They will also add a commentary to the clip to enhance the lesson.
