

App Evaluation

Title	BrainPOP Jr. Movie of the Week
Version (if there is one or if it is one of a series)	2.0.15
Publisher	BrainPop
Target Audience (if your opinion differ from the publisher, state that) Type(s) of software with your justification (can be more than one and when justifying, you have to convince me not just re-iterate my words)	Kids ages 6-8
Curriculum(s) - How does it (or can it) fit into the curriculum	This app could fit into any part of your curriculum because there are categories for each school subject.
Possible environment(s) and Why:	Possible environments include school or home, because teachers could use this app for students to view additional information on any subject matter that BrainPop has a video on and children could also use this app at home at their leisure to learn more about any subject of their choosing.
Cost: If there is a free version and a paid version, I want to know both: Are their costs for different licenses available and if so, what are they? In-app purchases	There is a free version for the download and in app you can purchase two different upgraded versions that will give you access to additional videos and quizzes. For a full version it costs \$6.99 and for the explorer version it costs \$2.99.
Write a paragraph or two describing the software: Assume I know nothing about the software. There needs to be enough description so that I can visualize this software	BrainPop is an app that can be used in classroom or at home that supplies many videos covering many relatable topics, for instance you can click on free videos that tell all about sugar, bullying, or classifying animals. Once the video has been viewed, students can take a quiz, answering questions on each topic to check for understanding.

<p>Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class: Include good and bad aspects of the program and/or things that were well done. For example, navigation was easy, screen design was good, sound effects were used effectively, and feedback was effective and immediate... o If you disagree on anything (from publisher or any review you see....) tell me</p>	<p>We really loved this app, the videos were cute, the subjects were appropriate and it was easy to navigate. This software would be appropriate for younger kids, but they must be able to read on their own. You could use this software as an resource to enhance any lesson.</p>
<p>Does the software pass?</p>	<p>Yes, this software passes!</p>
