App Evaluation

Title	Tutorial For Excel
Version (if there is one or if it is one of a series)	1.2
Publisher	Rana Hamad Khan
Target Audience (if your opinion differ from the publisher, state that) Type(s) of software with your justification (can be more than one and when justifying, you have to convince me not just re-iterate my words)	Target Audience is not listed, but after using app, we would say it would probably work better for grades 3-6 because they need to be able to read pretty well.
Curriculum(s) - How does it (or can it) fit into the curriculum	This could fit into any curriculum that you would use excel for.
Possible environment(s) and Why:	
Cost: If there is a free version and a paid version, I want to know both: Are their costs for different licenses available and if so, what are they? In-app purchases	The full version is completely free!
Write a paragraph or two describing the software: Assume I know nothing about the software. There needs to be enough description so that I can visualize this software	Tutorial for Excel is a free app that you can download for a thorough description of Excel. It has very detailed, step by step learning. You can not only learn the basics of operating Excel from a simple form to a complex form but there are also how to's for creating a variety of documents such as invoices, budget spreadsheets, student average projects, and your typical tables, comparison, and charts.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class: Include good and bad aspects of the program and/or things that were well done. For example, navigation was easy, screen design was good, sound effects were used effectively, and feedback was effective and immediate… o If you	We really loved this software, because it was so detailed. The only downfall we found was when we clicked on the option to see other excel learning software, there wasn't a back button, you had to go completely back into the app, but since students probably wouldn't be using that option, that wouldn't be a big deal. This could be used for any students that are just

disagree on anything (from publisher or any review you see….) tell me	beginning to work with excel for any type of project/core subject the teacher has in mind.
Does the software pass?	Yes!
