

## App Evaluation

Title	Padlet
Version (if there is one or if it is one of a series)	73.0
Publisher	WallwisherInc.
Target Audience (if your opinion differ from the publisher, state that) Type(s) of software with your justification (can be more than one and when justifying, you have to convince me not just re-iterate my words)	<p>4 years old and up.</p> <p>Our opinion is that is not the case, children should be a little older and at least know how to spell a few words before they start using the app. It is probably more for a minimum age of 7 and up.</p>
Curriculum(s) - How does it (or can it) fit into the curriculum	It can fit into any subject's curriculum for note taking, projects, lessons, and quizzes and allows teachers and students to share.
Possible environment(s) and Why:	This software can be used in a school environment for class assignments and even note taking and it could also be used to work on assignments and interact with classmates at home so long as you have an internet connection.
Cost: If there is a free version and a paid version, I want to know both: Are their costs for different licenses available and if so, what are they? In-app purchases	There is a free version of padlet and there are in app purchases that can be made for upgrades, you can get the Padlet jet pack yearly for \$34.99, the Padlet Pro monthly for \$12.99, and you can get the Padlet Pro yearly for \$99.99.
Write a paragraph or two describing the software: Assume I know nothing about the software. There needs to be enough description so that I can visualize this software	<p>Padlet is a software that can be used in the classroom to create documents that allow students to collaborate on.</p> <p>Teacher may use it for lessons and quizzes and also on group project assignments. Students can also use it to create notes and study guides. To collaborate, you can scan a QR code or the app can search for other padlets available to join.</p>

<p>Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class: Include good and bad aspects of the program and/or things that were well done. For example, navigation was easy, screen design was good, sound effects were used effectively, and feedback was effective and immediate... o If you disagree on anything (from publisher or any review you see....) tell me</p>	<p>This software has a lot of useful tools for teachers, students, and even parents, but it is a little hard to navigate, especially if you are new to the app. We could see where students who use it often would become good at operating it. Screen design was good, different colors and categories of documents to create. Again, you could use it in the classroom to create blog for students to communicate with each other and the teacher, teachers can create assignments that they are able to monitor as the students are working.</p>
<p>Does the software pass?</p>	<p>Yes.</p>
