Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class: Include good and bad aspects of the program and/or things that were well done. For example, navigation was easy, screen design was good, sound effects were used effectively, and feedback was effective and immediate... o If you	This software was very interesting. It made it easy to operate and easy to share codes. Although there aren't any bells and whistles, it's fun to use.
