Melissa Guill and Audrey Beggs

Brain Pop

Version: 3.1.9

Publisher: BrainPOP

Target Audience: 4+ (Ages 9-11)

Type of Software: Discovery Learning

Curriculum(s): Would work great for all subjects.   **Environment:** Single use, small group, whole classroom.

Cost: Free (In-App Purchases: $6.99 full Access)

Description: BrainPOP is an app for students to watch movies, play games, and take quizzes over a wide range of subjects and topics. It includes fun characters that all classes would love. The movies are enjoyable and the quizzes are very informative.

Impression: Great games and videos for students to increase comprehension of a subject. It is very interactive and eye-catching which would keep the students' attention. It would be a great app to use over the SmartBoard during in-class instruction time.

Does the Software Pass APPS? Yes
