

Swift Playground

Version: 3.1

Publisher: Apple

Target Audience: 4+, but we think students should be at least 10+ to use it because it is a little difficult.

Type of Software: Coding

Curriculum: We feel that this is probably best for a computer-related class. **Environment:** The opportunities here are endless.

Cost: Free

Description: This app opens up to alien characters. It comes with lessons and challenges to guide you through coding, and it ultimately helps you progress through all of them.

Impression: We really liked this app. Characters are fun, and the content is challenging but fun to learn and designed well.

Does the software pass APPS? yes
