

VideoShop

Version: 7.4.7

Publisher: Jajijujejo Inc.

Target Audience: This app has an age rating for people 4 years old and older. However, we think this app should be used by older students.

Type of Software: Video Maker

Curriculum: This app could be used in multiple subjects to create movies and presentations. **Environment:** small group

Cost: This app is free with no in-app purchases.

Description: VideoShop is a video editing app with fast editing tools, filters, etc. You can add music, merge videos, write text, apply filters, and resize things. Students can even add voiceovers to their videos or add animated titles. The videos can be shared on various forms of media.

Impression: We think there are better video editors out there, but videoshop could be acceptable. Students can create their own videos through the app, but may need supervision when looking online.

Does the software pass APPS? Yes.
