

Grade level/ Audience

5th grade

Curriculum topic

Science

Tools (be specific)

- Brain pop
- Smartboard
- Notebooks
- Pencils

Synopsis of what you are doing

The class will be in whole group and together we will take turns doing the activities on BrainPOP. The students will pick one type of matter (solid, liquid, gas) and write three examples of that type in their notebooks. I will check their notebooks after class to see if the students understand the type of matter they picked. Then students will take the quiz at the end of BrainPop.
