Describe the Software: This is an app for students to watch videos or movies, play educational games, and take small quizzes over a variety of subjects. It has a fun feel to the app and would make students interested in whatever topic they choose. This software could be used for brain breaks or to go along with lessons.

Impression of Software: We were very impressed by this software. We believe it would be a great learning tool to use in the classroom. The videos and games that are available through the app are packed with information yet keep the students entertained. The options are almost endless with this software.

Does the app pass? Yes
