Educational Software Write-Up

Title: Qrafter – QR Code

Version: 19.1

Publisher: Kerem Erkan

Target Audience: 4+

Curriculum: Teachers could use this software as a way to check in to class. Students could use their iPads to scan a QR Code for class that day to keep attendance. Schools could also implement this as a way for parents or guests to check in to events held at the school. Students could scan a QR code to view a lesson or module at a station. There are several ways for this to be used along with the curriculum.

Possible Environment: Classroom, school wide, school activity

Cost: Free

Describe the Software: Allows the user to scan a variety of codes such as EAN-13, UPC-A, and Code 128. QR codes can also be created quickly. There are several embedded software integrations that come with the app such as Twitter and Email.

Impression of Software: We loved this app! It would be an awesome way to keep attendance if technology is available. Students would enjoy using this app in a way that is different than others.

Does the app pass? Yes
