Describe the Software: Where's My Water? Is a great problem solving application. It has over 15 challenging puzzles. The user must figure out how to cut through dirt and guide water through many different scenarios. This software allows students to be creative in their strategies and thinking skills.

Impression of Software: We were not impressed by this software due to the amount of advertisements throughout the program. We believe this app is very simple and user friendly, but it would not be very appropriate for students to be on while in class. The ads may be distracting and take away too much time from the point of the software. There are options for this app to be ad free, but those are not the free version.

Does the app pass? No
