On-Line Tools

1. Kahoot
   https://kahoot.com/
- Kahoot is a tool that allows you to create quizzes. You also have the ability to search the site for quizzes that already exist. Class discussions and surveys can also be created on Kahoot. This is a game based response system. The administrator is able to see the amount of students that picked each response. Students can also create anonymous ids to see how they compare with the class.
- I would use Kahoot with my students to check their knowledge. This could also be used to help students warm up or test their understanding before big assignments. Students would be engaged and excited about this way to review information.

2. GoNoodle
   https://www.gonoodle.com/
- GoNoodle is a tool that gets kids moving with short interactive activities. It is free for any teacher anywhere. This tool is a wonderful transition tools. It allows students to make movement throughout the school day when they need to get up and move around. This tool helps motivate students to stay active and keeps them engaged. GoNoodle is very beneficial to the brain.
- I would use GoNoodle in my future classroom to give my students a break from the mundane school work. This would be a great reward for good behavior in my class. I would also use this tool when I notice my students being extra antsy or very hyper. GoNoodle would allow them to exert that energy while staying in the classroom. These brain breaks could be scheduled throughout the school day or just random whenever I feel they are necessary.

3. Edmodo
   https://www.edmodo.com/?utm_campaign=elearningindustry.com&utm_source=%2Fd
- Edmodo is a tool that connects teachers to students and students to resources. It is the world's largest learning network for grades K through 12. It can be used by students, teachers, administrators, and parents. Teachers can create online collaborative groups, provide education materials, measure student performance, and lastly communicate with other users.
- I would use Edmodo in my future classroom to give all of my students the equal opportunity to contribute to class discussions or activities. I would also use this tool as a place for students to submit work to. Edmodo is a tool that can be used to communicate with parents as well. I would communicate with parents for classroom parties and events. I would also allow my students to use Edmodo as a form of research for assignments.
