

Grade level:

1st grade

Curriculum Topic:

Padlet and Clips

URL:

<https://padlet.com>

<https://www.apple.com/clips/>

Synopsis:

During this lesson, students will be learning about how plants grow and what they need to grow. I have made a Padlet that explains how plants grow and what they need to grow. This Padlet shows pictures of what the plants will need to grow and how they grow to help students understand better. Once we have gone over the Padlet we will use our classroom plant to create a Clips. The Clips app will allow us to take different shot of the plant growing.

What students will do:

Students will learn how plants grow and what they need to grow through Padlet. Once we have finished the Padlet, we will start our first day of using the clips app on the classroom iPad. I will assign students to water the plant each day, giving each student a chance to participate.
