

**Grade Level:**

1<sup>st</sup> grade

**Curriculum topic:**

Science

**Tools:**

Ready Jet Go and Poll Everywhere

**Publisher and URL:**

Poll Everywhere, Inc.

<https://pbskids.org/readyjetgo/>

**Synopsis:**

I will be teaching a lesson on the stars and constellations! Ready Jet Go is a very interactive and educational app that is available on the classroom iPads! The app has step by step instructions on how to locate the stars in the sky and a boy that talks to whoever is using the app! I will have students write down 5 facts about the stars and constellations. Once I feel they have a grasp on the material, I will ask the to get into their groups and discuss what they have learned. I will have them come up with 5 facts as a groups and present to the class what they found. After discussing the material together in their groups, I will collect their facts! After going through the group facts I will make a quiz through Poll Everywhere and they will be taking a quiz over the material.

**How students will do it:**

Students will access the Ready Jet Go app through the classroom iPads! They will collect their own 5 facts about the stars and constellations through the app. Once they have all collected their facts, I will have them get into their assigned groups. They will use their own facts to share with their groups. Once the groups have come up with their own facts I will have them share out

with the classroom. Once they have all shared out, I will collect their group facts and use that to make a quiz on Poll Everywhere.
