- Title: Total Recall

- Version: 5.0 (Updated 1 year ago)

- Publisher:Zyense

- Target Audience: 4+

- Type(s) of software with your justification: We felt like Total Recall was a tool app because it is used to create webs and also used to help brainstorm ideas.

- Curriculum(s): As future teachers we felt like you could use this software to allow students to brainstorm their ideas in a well organized manor.

- Possible environment(s) and Why: We thought this app could be single user and also a teacher tool. It would be utilized as a single user because the students would use them on their own to brainstorm ideas. To classify it as a teacher tool we thought it could be used to keep track of what the students ideas were and to ensure that they are participating.

- Cost
  -This app was free of charge to download.
  -It says on the app store that there are in-app purchases but we did not encounter any when using the app itself.

- Write a paragraph or two describing the software
  -To use this app you will have to open it up and start a web by naming your first web circle. This will be your title for your web. As you add more they circles/ovals change colors which make it more appealing to the eye. The software is a bit outdated in the fact that it does not offer personalizations to your font or the color of your font. The app allows you to add as many new ideas as you want and you can move the areas around on the page and make them larger or smaller.

- Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class
  -We enjoyed this app because it was user friendly and easy to navigate. Students would have no problem using this app to brainstorm their ideas and thoughts.It is a good app to have students use to start out with before transferring to Inspirations or something of that caliber.

- Does the software pass

- Yes, We can see ourselves using this app in our classrooms as a introduction app to something like Inspiration. If students have this first then using Inspiration won't be as difficult for them and they can have an idea as to what to expect.
