

- Title: Seesaw-The Learning Journal
- Version: 6.1 (updated 2 weeks ago)
- Publisher: Seesaw Learning Inc.
- Target Audience: 4+
- Type(s) of software with your justification: We found this app to be a tutorial app because it is ran by the teacher and the students can only complete assignments that the teacher gives through the software.
- Curriculum(s) - This app could fit under any subject area that is taught in the classroom and the teacher has full reins on what the students see and do. It is hands on and very easy to use.
- Possible environment(s) and Why: The environments are limitless with this app. You can use it in the classroom and if the students have the technology you could also use this at home for homework. It can be used as a teaching tool, teacher use, and student use.
- Cost
 - There was no cost for this app.
 - There are in-app purchases found in the app but we did no encounter these when we used the app itself.
- Write a paragraph or two describing the software
 - This app is recommended highly by our group because of the endless possibilities that you can do with it as a teacher. The app starts you off by having you identify yourself as a teacher or a student. Of course as the teacher you would choose accordingly. After this step it shows you some step by step tutorial things that are easy to follow. After that you are on your own to explore and find things to use for your classroom. As a group we chose a math problem that used manipulatives to help break down fractions. As the student you can read directions made by the teacher and then follow them to complete the task. In the math problem the teacher asked the students to identify how many parts each manipulative had by drawing over them with a corresponding color. This will show the teacher that the student understands how to interpret the manipulatives at hand.
- Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class
 - We could only find good things with this app software and we loved it. Everything was so beneficial and helpful with all subjects. It was well organized and we liked that the teacher had control as to what the students were able to look at.

- Does the software pass
 - Yes, W loved this app and found that we could use it in many different ways in our future classrooms!
