

Digital Field Trips

Grade – 1st

Subject – Social Studies

Tools – Google Map and Google Docs

Synopsis – I will share a Google Docs with my students. They will fill out where their dream field trip would be to. Since they are 1st grade, I could also ask each student and put it into the Doc myself. Throughout the school year, each Friday, we will go on a virtual field trip to the places my kids picked out using Google Maps. This will allow my students to see different parts of the world they would not normally get to. We would also have a discussion and learn about each place we visit. I will get crafts to make as well.
