

Rubric Maker

Grade – 1st

Subject – Language

Tools – Rubric Maker and Google Forms

Synopsis – I will share a future assignment with my students. We will work together to create a rubric the students will have to follow. This will give them a better understanding on what they have to do to get a good grade on this assignment. I will show them the assignment and then send them a Google Forms. They will put what they think they would have to do to get a good grade on the assignment. We will go over everyone's answers and use them to create a rubric with a rubric maker. This way the students feel like they are contributing to the grading process.
