

Online tools

Kahoot

<https://kahoot.com/>

Kahoot is a great online tool that I will be using in my classroom. Kahoot allows me to create online quizzes and make them into games so that my students can have fun reviewing information. I also use this online tool for them to create their own quizzes for reviewing as well. Kahoot has other functions as well.

Quizlet

<https://quizlet.com/latest>

Quizlet is an online tool used for making digital flashcards. My students will be able to access their flash cards on any computer instead of carrying around paper flashcards and running the risk of losing them. I can also create my own flashcards pertaining to my lesson or even have the students give me the information as I fill in the cards allowing them to review from muscle memory.

Google Drive

<https://www.google.com/drive/>

Through google drive I can create docs, spreadsheets, polls, PowerPoints, quizzes, and homework pages that can be shared with my students to be able to access at any time and create their own documents. Using google is a great tool to integrate into the classroom for not only students but for parents as well. I can use google classroom to keep parents updated as well.
