

## Mini Lesson Five

Grade level: 3<sup>rd</sup>

Topic: Science

Standard: 3-LS2-1 Construct an argument that some animals form groups that help members survive.

Materials needed:

Access to iPads

Instruction: Students will be in groups of four. Each group should have access to an iPad to perform research activities from specific third grade appropriate sites provided by the teacher. The teacher will instruct the students that they are to find evidence of a specific animal per group that runs in a pack/colony/group to help them survive as a whole. Much like our human families help us to survive.
