

## Lesson 2 Specdrums & QR Reader

### 7<sup>th</sup> Grade Art/Music Pullouts

Tools: Specdrums, QR Codes of art printed on handout, QR Reader

The object of this lesson is to integrate Art & Music class and use technology to explore art and music. Students will be divided into pairs and given a handout that has a number of QR codes linking them to various pieces of artwork. Students will scan the code and access the art images. Their assignment is to select one image, print it out on the color printer, and then use the Specdrums to create a piece of music by using the colors and design in the art. Students will choose the music set they wish to download and incorporate in their musical translation of the art. We want the students to tell a musical story of the visual piece of art.
