Lesson 3 *Technology Tail* e-book & Spreadsheet

6th Grade Technology/Computer pullout

Tools: Spreadsheet w/ template, social media format (Facebook, Instagram, etc.), and

Technology Tail e-book

The object of the lesson is to show students the reach of the internet and consequences of its

misuse. This will be a whole group activity. First, we will read the e-book Technology Tail as a

group on the smartboard. Then, students will help me create a photo and caption to post on my

personal social media account. Once the post is made, we will track how the post travels across

the internet. A spreadsheet template that I create prior to the activity will provide a place to

input dates and locations (states & countries) of where the information lands. Each day we

check the activity of the social media post will provide opportunities to talk about internet

safety. The length of monitoring will last a minimum of one week, however we will check on the

activity as the year progresses.
