

Lesson 5 Goodreads App & Padlet

7th Grade ELA

Tools: Goodreads app, Book, Padlet, AR Quiz

The object of this lesson is to encourage students to use technology to explore book options, find a book they would like to read, take an AR test, and create a book report using the Padlet book report template. Students will first use Goodreads app to individually find a book that is of interest to them and meets certain criteria that I provide. Once they have decided on and checked out the book from the library, they will read it and take an AR test. After completing the book, students will access Padlet and create a book report based on the template provided. After Padlet book reports are complete, students will present to the class on the smartboard.
