

PowerPoint E-Book

I chose to use an Atlas because it is a good tool to have for teaching History, specifically Geography. Since my class projects focus on students at an 8th Grade level, I felt it was important to have more content and academic vocabulary. This book could be used to explore the various Continents in the World and learn a little about the culture in each. There are a number of great vocabulary words, maps, and a variety of engaging visuals that could spark discussion.
