

1. Grade Level: 2nd
2. Curriculum Topic: Social Studies- AR Map
3. Tools: Bug Bot, Google Earth
4. Synopsis: TTW place a large map of Arkansas on the floor, and gather the coding sequences. TTW read a coding sequence out loud telling what directions to go. Once the sequence is programmed place it on the "X" on the bottom of the map and press the play button. When the Bug bot stops, check and see what city, landmark, etc. that it lands on. Then we will pull up the specific place on Google maps and explore it. This will be done as a class and we will discuss key observations and facts about said place.
