Title: Tiny Decisions

Version: 2.5.1

Publisher/ Creator: Xin Wang

Target Audience: 4 and up

Types of software: Problem Solving because this is an app where you have to pick blindly what you are going to learn about.

Curriculum: This is not traditionally an educational app, but I feel like I could put a spin on it. I would put different things in the app, then groups would blindly pick one by one. Under each one, it will reveal the topic that they will be doing their project on.

Cost: Free

Description: It is an app that makes you make a decision on certain things. Sometimes you don't know what you are going to get. That is what makes it fun!

Impression: It is a very simple app. Very easy to use. I feel like you could use this for not only educational fun, but for personal reasons in your life.

Does the software pass Review? Yes

Does the software pass Evaluation? Yes

IPad or Android? IPad

How it works: You just put the options and then it either makes you pick, or it can pick for you.
