

## Mini Lesson 3: QR Code and Kahoot

**Grade Level:** 4<sup>th</sup> Grade

**Curriculum Topic:**

G.10.4.3: Compare push-pull factors that influenced immigration to and migration within the United States.

**Tools/Technology:** For this lesson, I will be incorporating QR Code and Kahoot.

**Synopsis:** Students will get on their iPads and use the QR Code app to access the Kahoot quiz that the teacher designed. This Kahoot will serve as a review of the push-pull factors that influenced immigration that we have already discussed in class. The students will work individually to choose the correct answers on the quiz, and the teacher will use the results to determine if their students are proficient in the topic.
