

RECYCLE! KINDERGARTEN'S DOING IT!

For the past month, kindergarten has been collecting recyclable items for a competition. We are excited to announce that we collected a total of **3313 recycled items**.

We have been learning that Americans throw away a lot of trash. Americans represent 5% of the world's population, but generate 30% of the world's garbage, and over half of what we throw away could be recycled!

Recycling is important because it helps reduce pollution. It is our job to help keep the earth clean!

How can you make a difference?

"I can recycle water bottles instead of throwing them away" – Rosie

"I can teach my family why recycling is important." – Ethan

"I can put a recycle bin in my classroom so we don't have to throw things away." – Gracie
