

## App Evaluation Write Up

Name of App: Hopscotch

Evaluators: Kennedy Capps & Baylee Nahlen

Criteria	Comments
Title	Hopscotch
Version	3.32.1
Publisher	Hopscotch Technologies
Audience	The app is made for children ages 9-11.
Type	This is a coding app, therefore we believe that it would fall under the problem-solving category.. Users are able to create movements and code different characters and objects
Curriculum	This would be a good brain break for students to get on the app while also having to think through codes. This app would also work good with a lot of math activities.
Environment(s):	This would be great for in the classroom or at home. Kids might need help understanding how to use the app, but once they get that figured out they would be able to play around on it at home.
Cost	The app is free for a month but then to buy a year subscription it is \$79.99.
Describe the app	You have the option to watch many video tutorials on how to code and create games. You can either start from scratch and play around with objects and code them to do certain things like jump or spin. You also have the option to create a game. Thankfully there are a lot of tutorials on how to do that and you can

## App Evaluation Write Up

	<p>even make well known games. There are some tutorials that are locked for the free trial though. The videos walk you through how to place and order your objects. The app has a lot of helpful tools. It also comes with a lot of freedom if you are starting from scratch. There are so many fun things for students to choose from.</p>
Our impressions of the app	<p>We thought this app was very fun for kids! It has a lot of really cool colors and illustrations. This app was one of the best coding apps we have seen! Coding can sometimes be really complicated, but we felt like this app put it in an easy way for students to work with. We really liked how you can create games and share them with other people. You can also see and play with other projects created by other users. This was really helpful when trying to gather ideas and see the different things possible on the app. It is a very fun app that we think all kids would enjoy. It is a little expensive if you were to purchase the year subscription though.</p>
Does the app pass?	<p>Yes the software does pass!</p>
