

App Evaluation Write Up

Name of App: Move the Turtle

Evaluators: Kennedy Capps & Baylee Nahlen

| Criteria | Comments |
|------------------|---|
| Title | Move the Turtle |
| Version | 1.5.1 |
| Publisher | Next Is Great |
| Audience | According to the developer, is could be used for children aged 4 and up, but is recommended for children around the age of 9-11. We agree that it is for children 9-11 and up. This a hard app to use in comparison to other coding apps out there, we struggled a bit with it. |
| Type | We classified this app as a problem solving app because you are trying to accomplish moving the turtle in a certain path dictated by the level that you are on. |
| Curriculum | It's a straight-forward coding app. It teaches children to code. |
| Environment(s): | This could be used in the classroom for a STEAM day, or if you want you to integrate coding into your classroom lessons. It can also be used at home for parents who want to broaden their children's thinking. |
| Cost | The app costs \$3.99 |
| Describe the app | This is a coding software where it takes you though lessons so that you learn how to code and the goal of each section is to move the turtle through a series of activities to get to the end result that they want. |

|----------------------------|---|
| Our impressions of the app | We think that there are apps out there that would be better for younger children. This app was hard for us to figure out, so we can't imagine trying to get younger elementary aged children to use it. |
| Does the app pass? | In comparison to the other coding apps that we have tried, no this app does not pass. |
