

Grade Level: Third Grade Students

Topic: Spelling

Technologies:

BeeBot <https://www.bee-bot.us/>

Kahoot <http://kahoot.com/>

Synopsis:

Students will be split up into 4 even groups. Each group will have a BeeBot. I will give each group a stack of flash cards that has spelling words on them. Each person in the group will take turns coding the Bee to make it spell out the words. After each group has made it through their stack of spelling words, I will have the students sit back down at their desk. I will then pull up Kahoot and have the students take a short quiz on the spelling words just to see how effective the activity was. My goal is for students to work hard coding and be able to remember the words better because of the activity.
