

Mathematics Pre-Assessment Mini Lesson

This assignment will be for a kindergarten class and will cover the topic of Mathematics. Students will be assessed over their basic math skills in a large group setting using their assigned devices. We will use Poll Everywhere as an anonymous source for me to gain an understanding of where students stand in their math knowledge. They will be presented question and use their device to answer the questions. The technologies used in the class for this assignment will be the smart board projector, the student devices, and the Poll Everywhere tool.
