Title: Go Noodle - Kids Videos

Publisher: GoNoodle, Inc.

Target Audience: 0-10

Types of Software: This could be used as a tool or discovery learning software. It could be used if the students cannot go outside for recess or if they just need to move around. Discovery learning could be the software if the student wants to learn about something specific and they choose the song.

Curriculum: This could be used during a music lesson while teaching A,B,C's, colors, or it could be used for a brain break or a movement lesson.

Cost: Free, no ads, or in-app purchases.

The software is kind of like a kid's Youtube. It is easy to navigate, it has different categories like channels. It is filled with videos that are educational, fun, and some that are in Spanish. It is brightly colored with no bells and whistles, and a parent section where you can create your own family account.

The app is easy to navigate. The videos are appropriate for children. The videos are like kids bop, Koo Koo Kangaroo, educational music, and more. It would be a great app to use in class for transitions or just to give the students a brain break. It is a simple app like another version of YouTube for kids.
