

Mini Lesson- Creative Art Making

Grade Level: Kindergarten

Curriculum Topic: Creative Art Making-Self Portraits

Tools: Sketch-it App and Google Drawings

Synopsis: This is a creative art lesson where students will draw themselves. First, the teacher will have students use Google Drawing at center time (their turn at computers) to create a picture of what they think they look like. They will be instructed to use whatever tools they would like to create a picture of themselves. Later that day, students will use their iPads to take a selfie, import it into the Sketch-It App (teacher will go around to each table and help with importing) and trace over it to draw a self-portrait. Students will be instructed to use whichever drawing utensil they wish to and whatever colors they see fit. Their drawing will be printed out and displayed during parent/teacher conference.
