Evaluation Write-Up

Group Member Names: Sydney Sweat, Corey Anderson, Katie Anderson

App Title: Brain Pop

Publisher or Producer: BrainPOP

Version of App: 1.0.5

Target Audience: Ages 4+ but mostly aimed for kids who are ages 9-11.

Type(s) of Software: Discovery Learning – The user gets to decide what is to be learned by choosing from a variety of videos to watch.

How does it fit into the curriculum? This is a tutorial app. You are learning new connections and a completely new language through videos. These videos are very helpful in learning new information and engaging the user.

Cost or in-app purchases: Full access is $59.99 but to access each level is $24.00 if you don't want to fully access the program. There is a free/lite version available.

Description of the Software: Uses animated movies to model conversational English. This is a leveled program to go over step by step in developing vocabulary and usage. There are quizzes and activities that go with the videos previous to it.

Impression of the Software: I was impressed with the software. I'm sure this could be a more impressive software once fully purchased, but it was still found to be useful and informative! This would benefit a classroom greatly especially when ELL are in your class.

Does the software pass APPS: Yes
