App Title: Duolingo

Publisher or Producer: Duolingo, Inc

Version of App: 6.58.0

Target Audience: It was made for ages 4+, but the audience can be people of all ages.

Type(s) of Software: Tutorial – This app teaches users a new language. It allows the user to learn skills and move to harder levels once a skill is mastered.

How does it fit into the curriculum? As a teacher who will experience ELL students this is an app that I'll find very useful. The students in our class will be able to use this app to be more welcoming to ELL students. We could also use vocabulary words in our class and find the Spanish version through Duolingo.

Cost or in-app purchases: The free version is all that the user needs. It provides what the user needs. There is a \$12.99 a month purchase to remove ads and extra features.

Description of the Software: It's an app made to teach the user an option of 30 languages. It provides a variety of games, quizzes, and questions to help grow the comprehension and understanding of the languages. It's perfect for someone who has experience with the language, but also has none.

Impression of the Software: It was a very useful and interesting app! If ever needed to learn a new language or pick up on phrases, this is the app that I would turn to. I would recommend this app to anyone who is in search of this meaning.

Does the software pass APPS: Yes
