

6th Grade

Math- Statistics

Excel, Padlet

Synopsis: I will be posting an assignment on Padlet about mean median and mode. Students will be given a bag of M&Ms and asked to find the mean, median, and mode of the colors in the bag. They will be grouped up during this time. One student will separate the M&Ms, one will record data, and one will present the data. Students will post their Spreadsheet onto Padlet and present their findings. They will need to show their work on how they achieved their answers.
