

Evaluation Write-Up

Group Member Names: Sydney Sweat, Corey Anderson, Katie Anderson

App Title: Padlet

Publisher or Producer: Wallwisher, Inc.

Version of App: 111.0

Target Audience: 4+, but we recommend 8+

Type(s) of Software: Tool – It is used for students to create different types of posters, flyers, documents, etc.

How does it fit into the curriculum? Students can create different content such as posters. It would be useful to do a group project at the end of a lesson or unit.

Cost or in-app purchases: Free to download, but to get the most out of it you would have to buy it for \$12.99/month or \$99.99/year.

Description of the Software: This app is used to make creative content. Users can make posters, documents, flyers, etc. to share with others. You can add colors, diagrams, pictures, and text to anything you create. However, you can only add the free items unless you purchase the app.

Impression of the Software: It was very difficult to use, and not worth getting the free version. In order to really get the most out of the app, the user would need to purchase it. If the full version was purchased, it would have been a great app. We wanted to be able to see what all it could create.

Does the software pass APPS: No
