Cassidy Brewer Snyder
Mini Lesson Fall 2020

Communicating Electronically

Grade Level: 2nd

Curriculum: Computer Science CC.11.2.1 Discuss as a class how information can be communicated electronically.

Tools: Poll Everywhere & The Technology Tail: A Digital Footprint Story

Synopsis: I would begin this by reading The Technology Tail: A Digital Footprint Story to my students. After reading the book to my students, I would have them to use their iPads to answer the questions I ask using the words on the board. I would ask them to name something that can hurt our technology tail, to name something that would be a gift, and so on. Students would do this individually. Their answers would show up on our Smart Board and this would allow us to discuss everyone's answers and how we need to be as we communicate electronically.
