

Story Structure

Grade Level: 2nd

Curriculum: Language Arts RL.2.5 Describe the overall structure of a story, including describing how the beginning introduces the story and the ending concludes the action.

Tools: BeeBot and Hello Ruby: Journey Inside the Computer

Synopsis: I would begin this by reading Hello Ruby: Journey Inside the Computer to my students. After I have read the story, I will split my students into groups of 3 and have them use a BeeBot to put the events that happened in the story, in order. I would have copies of the main events printed, inside a plastic sleeve, and taped to either the floor or the tables. The students would rotate after each turn and program the BeeBot to land on each event in order. They would take that event cards and place them in a line after the BeeBot lands on them.
