

Online Safety with Quiz and Google Docs

1. 3rd-5th grade
2. Online Safety
3. <https://www.esafety.gov.au/kids-quiz/> and Google Docs
4. Students will take the online quiz, checking their answers and recording their initial score (the test won't let you complete without making a perfect score). Then as a class, we will create a shared google doc and discuss why some of the answers were wrong (clears up confusion). Then we will talk more about online safety and record some of the best thoughts using Google Docs. For the future, if we notice anyone using the internet in an unsafe manner, we will refer them to this google doc and tell the teacher.
