

Chesney Dennis  
Mini Lesson- Integrating Technology

### Characters, Setting, and Plot

**Grade:** 2<sup>nd</sup>

**Class and Topic:** English Language Arts- Using Illustrations to determine characters, setting, and plot.

**Tools:** Power-Point with Images from Story books, *Rocketbook* for each student, and iPad for each student.

**Synopsis:** Before class I will create an interactive PowerPoint that displays various images from story books that are second grade level. I would then ask the students to take out their *Rocketbooks* and iPads to begin the activity. Next, I would go through the numbered slides and ask the students to infer what the setting is, who the characters are, and a brief plot of the story. Students would then scan in their responses for grading and erase their *Rocketbooks*. This activity requires students to infer from a picture while using advanced classroom technology.
