DESCRIPTION OF APP:

This is free for anyone with a Google account. Teachers can create a code for each class for the students to log on. Each class can have all the materials the student needs and can be shared with all the students by giving them the class code. These materials can be of different files and apps. Teachers can post new assignments for the students and grade old ones. The students could have access to these files both at home and in school.

OUR REVIEW:

This software gives a very good impression. It has a great appearance and is user friendly. We think a student would enjoy this because material is all in one access point. It has a very good screen design that makes it easy to access any class. This is a great program to use to post assignments, notes, quizzes, and other material for students. It could fit any curriculum depending on what the teacher posts.

TYPE OF SOFTWARE/ ENVIRONMENT:

Software: This app is a tool software. The teacher can use this software to make new assignments for the students and include many different files. The files that the teacher creates and posts on Google Classroom could use any other software that can fall in any of the 6 basic types.

Environment: This is a teacher tool. Teacher uses this software to make a virtual classroom with all the lessons and assignments. Single user, each user can use it individually. Small group, the group could have access to the same shared material. One computer classroom, the whole class can view a video or any of the assignments.

CURRICULUM:

It fits any curriculum perfectly because the teacher decides what is to be posted on google classroom according to the curriculum and the required standards .
