## DESCRIPTION OF APP:

Newsela is an app where students are able to go read recent news articles of different events around the world. When you first open the app, there are various news articles to choose from at the interest of the child. If the student has a class code, they are also able to practice their reading comprehension by taking a small quiz. They are able to adjust the article of their choice to their reading level. Through this app, students are able to see their progression through these articles and activities.

## OUR REVIEW:

Newsela is an amazing app to introduce to our fifth graders. The news articles that are introduced to students may be of interest since it is current news that is happening around their world. The articles offered everyday are interesting. This app is designed very well, has great graphics, easy to navigate and feedback on the quizzes are effective. It is an awesome app for struggling readers, where they can adjust the level of reading. We do wish maybe read aloud or a video was available to go with the article.

With this app, fifth graders will be able to see how they progress in their reading and experience different genres of literacy. Teachers can allow students to use this app as their silent reading or personal reading time. Teachers could also pull an article they could work on together as a class or group.

## TYPE OF SOFTWARE/ ENVIRONMENT:

**Software:** This software is a Discovery Learning app because students can log in and read new articles from around the world at their own reading levels. They can also test their reading comprehension with mini quizzes in each article.

**Environment:** The environments this app would fit in is mobile, single user, and small group environments. With mobile environments and single users, each student would need their own device to read articles individually during silent reading or if they have extra time. This app can also be used in small groups. During small groups, a teacher may assign, read together or ask the students to choose an article at that groups level.

## CURRICULUM:

For fifth grade, this a great time to introduce them to new articles as a reading genre. Students can login into Newsela with a class code and go and read news articles from around the world at their own reading levels. With the class code students are able to take mini quizzes to show mastery in reading comprehension.
