- 1<sup>ST</sup> offence: WARNING!
- 2<sup>nd</sup> offence: Temporary loss of privileges, equipment, items, and activities.
- 3<sup>rd</sup> offence: Permanent loss of privileges, equipment, items, and activities.

Millions of people search the internet each and every day. People today use the internet for countless number of things. The internet can be very useful, however, there are important things to keep in mind when using it.

Plagiarism is by far one of the most difficult things to prevent when using the internet.

Anything that can be found on the internet from another person, can't be used by another individual, unless they give the other person credit for their work. Plagiarism is very crucial in order to maintain good digital citizenship.

Copyright is also a major key component of the internet. Copyright laws allow the author of a work to control when their work is copied. Copyright goes hand in hand with plagiarism, therefore, make sure you always give authors credit for their work when you use it in your own.

\*I will not plagiarize by using other authors work. \*
