BrainPOP

Version 3.1.9

© BrainPop

- Target Audience: This app contains animated movies that motivate mid-level students to learn. Each movie is paired with an interactive quiz so children can test their new knowledge. It creates digital content that engages students and supports teachers.

- Types of Software: BrainPOP might best be used on an iPad or computer. This app is mainly for individual use; however, it can be used in small groups as well.

- Curriculum
  - BrainPOP gives students the chance to explore hundreds of topics such as: Science, Math, Social Studies, English, Engineering & Tech, Arts & Music, Health, etc.
  - Quizzes can be very beneficial to students. They prepare students for future assessments in a fun and creative way.

- Cost: This app is free.
  - Full access- $6.99/month
  - Some access- $2.99/month (includes movies and quizzes).
  - The free version is not enough because it does not allow full access to students.

- Description of software: BrainPOP is a great app for mid-level students to explore various informative topics that rotate every day. It allows students to watch animated movies that include closed captions for students to read along. After each movie, students can take a quiz over what was discussed in the video. This app is a great way for educators to teach certain subjects because it is interactive and engaging.

- Impressions of software: BrainPOP is a very fun app for students to have fun while learning. Its animated movies pack a ton of information into just a few minutes, using a conversational style that is easy to understand. We both enjoyed using this app and would recommend it to mid-level educators.

- This app passed our software evaluation.
